

CV

Employed as a software developer. Mostly working with Java and Angular on a project in production. I have experience in tool development and app development. Handling the design, implementation, infrastructure and maintenance. I like to have the whole picture.

EXPERIENCE

Software developer SRC d.o.o.

2024-10 – present

I build and maintain Java services on Quarkus, with PostgreSQL and Oracle behind them and Vue and Angular front ends on top. I take a feature from the schema to the screen, ship it with Docker and Jenkins, and keep it running once it is there.

SRC took me on full time after a year and a half of working here alongside my studies.

Student developer SRC d.o.o.

2023-01 – 2024-09

I joined while I was finishing my master's, working alongside my studies on the same stack I use now. This is where I learned the codebase.

EDUCATION

Master's degree, computer science FERI

2021 – 2024

My thesis was **Comparison of LSTM, CNN and Transformer models as well as their combinations at time series forecasting**.

[DKUM](#)

Bachelor's degree, computer science FERI

2018 – 2021

My thesis was **Development of voxel-based graphics rendering engine**.

SKILLS

End to end. A product through every layer and out the door. The schema, the service, the interface, the deployment, and the machine it runs on.

At work. Java and Quarkus, PostgreSQL and Oracle, Vue and Angular, Docker, and the tools I build around them.

By choice. Linux, NixOS, and the services I run on my own hardware.

Also worked in. C++, Python, Go, Zig, Lua.
